Hi Janette,

Attached is the PACCAR consultant submitted data for your reference. I have not reviewed the data yet. Let me know if you need any additional info.

Regards,

Sam

Hi Janette,

The revised CMP (see attached file) is still under review. Let me know if you could not access those files. I will request the concentration info from PACCAR consultant and share with you once it is available.

Regards,

Sam

Hi Sam,

I'm checking in to see if the CMP is final, and whether it would be ok to share either the draft or the final with the consultant for Container Properties/Rhone Poulenc? Also, do you have any data available yet that you could share with me? In particular I'm interested in finding out the locations

and results of any dioxin/furan samples associated with any of the excavations, and all the results for Area 3 along the property boundary.

Thank you,
Janette

Sam, thank you for the quick reply and the files. I was able to access them just fine. I'd be interested to see the lab results from all three excavations if/when you are able to share them.
-Janette

Hi Janette,

The Compliance Monitoring Report (CMP) for the 8801 Site has not been finalized yet. I have few comments for the most recent submittal, so it is still in the process to be finalized. Attached please find the email for the recent submitted CMP for your reference. Let me know if you do not have access to the documents.

The excavation for Areas 3 and 5 were completed. Additional excavation for Area 4 is required because it could not meet the remedial level for copper (Cu) even the last excavation had been expanded extensively from its original plan. Last week field work had been conducted for collecting pre-excavation soil samples. I am waiting to hear the lab results.

Let me know if you need more information or discussions.

Regards,

Sam Wang, Ph.D., P.E.

Hi Sam. I'm the RCRA corrective action project manager for the former Rhone-Poulenc facility (i.e. Container Properties) to the south of 8801. I'm working with Container Properties' consultant to fill some data gaps before we move into the Corrective Measures Study. I'd like to get some additional information from you about 8801 that I couldn't find on the webpage or in the documents. The Engineering Design Report for the excavations referenced S&W's 2021 Compliance Monitoring Plan, but I didn't see that on the webpage. Could you send that to me? Also, we're interested in the status of work at the 8801 site, and any results from the excavations closest to the Former Rhone-Poulenc property (proposed remediation areas 3 and 4, maybe 5).

I'm happy to set up a Teams meeting if that's easier than email for you, or feel free to call me.
Thanks for your assistance.

Regards,
Janette
